

New York State is Leading the Way in UAS Development

New York State is making industry-defining investments with a commitment to growing the UAS industry over the next five years.

With an industrial heritage rooted in aerospace and sensing systems, Central New York and the Mohawk Valley regions are leading the way with the development of a dynamic corridor of innovation and testing that will take the UAS industry to new heights.

The launch of the world's first 50-mile unmanned traffic management (UTM) corridor and the creation of NUSTAR, the most comprehensive UAS test facility in the nation are both current elements of the Unmanned Secure Autonomous Flight Environment (U-SAFE) program.

\$10MM

dedicated to support the startup economy in Central New York...and counting

\$50MM

in infrastructure investments and incentives for UAS businesses to grow...and counting

Our 3 Focus Areas:

Startups

Our startup ecosystem includes university research, incubators, and the worlds largest accelerator for unmanned systems.

Businesses

Some of the world's best companies in UAS are already doing business here, join them and be at the center of a revolution.

Partnerships

Join public and private partnerships with universities, NGOs, and governments, that influence standards and policy for airspace.

JOB FUND

Our UAS Central Job Fund is funded through a \$5 Million grant from New York State. It offers assistance to companies to increase their presence and investments in New York by offering incentives directly related to job creation.

RISE WITH NEW YORK

We are ready to help you grow your Unmanned Systems business.

If you have questions about how you can become more involved with NYS, please contact Mike Novakowski, director of Business Development, at mnovakowski@centerstateceo.com.
